He further explained different types of diabetes and efforts made to overcome this ailment through an artificial pancreas technology. He also described that how physiological system is mathematically modeled and treated with linear control to find the reason of not using a fully artificial pancreas even in this era of technology.

Virtual University Student Success Story

Salma Noreen, a student of Virtual University of Pakistan has been acknowledged by Yahoo and Freelancer.com for finding vulnerability issues in their websites. She is the only female holding white-hat badge and yahoomercho logo on her profile for her tremendous work in software development technology. She is an inhabitant of a small city of Attock in Northern Punjab. Acquiring an MBA from Virtual University of Pakistan was the turning point in her life that enabled her to earn a decent living in a small city. After learning about Bug Bounty Programs (BBPs) through social media, she started working on vulnerability issues in software technology; she is successfully working on web security now. Moreover, her achievements in web technology are greatly acknowledged by The Express Tribune, a leading newspaper in the country, Microsoft, Word Press website and Facebook fans.
